

# 5 reasons to choose Interoute Virtual Data Centre. Globally Networked Cloud Computing.

1

## Public cloud experience. Public - Private network.

Fully automated cloud computing solution that delivers both public and real private cloud computing.

2

## Automated hybrid computing integration.

Interoute's innovative hybrid technology consolidates all your IT assets regardless of where they are.

3

## More locations. More control.

Instant access to Europe's densest cloud computing platform with 10 locations in Europe and 13 globally.

4

## Fast performance. Low cost.

The global VDC network offers low latency and high throughputs; use less resource to get closer to your customers.

5

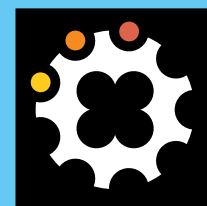

## FREE network between zones.\*

Build an interconnected, globally distributed cloud with ultra low latency.

“ In Interoute we have found a partner who can match the high levels of performance and quality that UEFA and its competitions stand for. ”

Daniel Marion, Head of Information & Communication Technology UEFA

InterouteVDC

# What makes Interoute VDC stand out from the cloud?

Cloud Service Provider:		Interoute	Amazon	Microsoft
Price	Cloud Service:	VDC	AWS	Azure
	Is data transfer and networking free of charge?	✓*	✗	✗
Service & Support	What is the compute platform service level for any single zone?	99.99%	None**	None**
	Online Live Chat Support	✓	✓	✗
Geographic Locations in Europe	U.K.	✓ London (2), Slough	✗	✗
	Spain	✓ Madrid	✗	✗
	Switzerland	✓ Geneva	✗	✗
	The Netherlands	✓ Amsterdam	✗	✓ The Netherlands
	Italy	✓ Milan	✗	✗
	Ireland	✗	✓ Dublin (3)	✓ Ireland
	Germany	✓ Frankfurt, Berlin	✓ Frankfurt (2)	✗
	France	✓ Paris	✗	✗
	Manageability	Is the provider a European headquartered business with less exposure to the U.S. Patriot Act?	✓	✗
Hybrid readiness - can the service be automatically integrated with physical devices and colocation services?		✓	✗	✗

\* Moving data using the Interoute IP Network between Zones as well as to and from the Internet is without charge but subject to the Fair Use Policy set forth in Virtual Data Centre - Schedule 2N available at [www.interoute.com/uk-term](http://www.interoute.com/uk-term)

\*\*AWS and Azure require services to be delivered from two or more platforms in order to get an SLA and these are then 99.95% and 99.95% - 99.99% respectively. Information accurate as per parties' websites 20.11.14.
